DANIEL RAHIM

IT LEADER | MANUFACTURING IT, MES, ERP & OT/IT INTEGRATION

Nashville, TN | 615-956-5810 | rahimd94@yahoo.com | www.brewbit.tech

PROFESSIONAL SUMMARY

Hands-on IT leader with 17+ years of enterprise technology experience, including on-site leadership of manufacturing IT across multi-site steel operations. Experience spans MES and shop-floor systems (OTOMES), ERP-to-MES integration (SAP, QAD, NetSuite, IQMS), PLC/SCADA and HMI integration, plant networking and site infrastructure, and Power BI manufacturing dashboards and KPIs. Partners daily with plant operations, manufacturing engineering, quality, vendors and corporate ERP, cybersecurity and infrastructure teams to improve production-system availability, traceability and uptime, and to deliver practical, near-real-time visibility from the factory floor. Strong vendor management, project execution, business continuity/disaster recovery and IT/OT security background.

MANUFACTURING IT & TECHNOLOGY EXPERTISE

Manufacturing & OT/IT	MES (Manufacturing Execution System); OTOMES shop-floor systems; ERP-to-MES integration; work order routing and production tracking; traceability and genealogy support; PLC/SCADA; HMI; OT/IT integration; industrial networking; production monitoring; downtime reduction
ERP & Business Systems	SAP ERP; QAD-to-SAP migration; Oracle NetSuite; Workday ERP; Microsoft Dynamics; IQMS; Syteline; ERP/MES application integration
Manufacturing Data & Reporting	Power BI analytics; MES and production data dashboards; real-time equipment monitoring; data warehouse/ETL (Informatica, Jitterbit); manufacturing KPIs; reporting and decision support
Plant Infrastructure	Plant and site infrastructure; LAN/WAN/Wi-Fi; SD-WAN; Fortinet firewalls and switching; network segmentation; shop-floor endpoints; Azure; virtualization; endpoint and identity services
Security & Resilience	Zero Trust; privileged access management; MFA/SSO; NIST; ISO 27001; vulnerability management; business continuity; disaster recovery
IT Operations & Leadership	On-site manufacturing IT support; helpdesk and incident/change management; vendor and contract-partner management; project execution; budgets; SOPs and documentation; asset management; cross-functional leadership with Operations, Engineering and Quality

PROFESSIONAL EXPERIENCE

TEX-TUBE COMPANY | 2024–2026 | Houston, TX | Multi-site steel manufacturing

Head of IT Infrastructure

Led infrastructure, manufacturing technology, MES and shop-floor systems, cybersecurity, and modernization across steel manufacturing operations in Houston and Atchison, Kansas, plus 10 remote offices. Partnered with the plant and executive stakeholders on technology roadmaps, budgets, service reliability, and production priorities.

- Led migration of legacy QAD ERP to SAP ERP, coordinating application, infrastructure and ERP-to-MES/shop-floor integration readiness as part of broader manufacturing technology modernization.
- Supported MES and manufacturing OT/IT systems, including OTOMES shop-floor/MES, Allen-Bradley and Siemens PLC/SCADA and HMI environments; enabled real-time production monitoring and control, MES data flow to ERP, and contributed to a reported 20% productivity improvement and downtime reduction.
- Modernized core systems and infrastructure through centralized data center and Microsoft Azure migration, reducing operational costs by 20% while improving scalability across manufacturing facilities and offices.
- Designed and deployed plant-wide LAN/WAN, SD-WAN, Wi-Fi, Fortinet firewalls and switching across a 100-acre mill environment to support reliable and secure connectivity.
- Implemented Power BI analytics (including MES and production data reporting) and Dynatrace AIOps to deliver operational visibility, manufacturing KPIs, monitoring, and data-driven decisions.
- Strengthened IT/OT security with Zero Trust practices, MFA, SSO, endpoint protection, vulnerability management, and external penetration testing.
- Implemented Halo ITSM to improve service management, incident handling, and support responsiveness.

CELINK | Jan 2022–Dec 2023 | Austin, TX

Director of IT Infrastructure and Applications

Directed infrastructure, applications, cybersecurity, and end-user services across a business-critical environment supporting 2,000+ users; managed cross-functional teams, strategic vendors, and technology budgets up to $30M.

- Led migration of the on-premises data center and 30 core applications/services to AWS and Microsoft 365, improving reliability by 20% and reducing operational costs by 35%.
- Collaborated on end-to-end Microsoft Dynamics 365 and CRM implementation, including ongoing application support, identity controls, SSO, and MFA.
- Implemented Halo ITSM and strengthened incident/change management, reducing incident resolution time by 50% and improving change control.
- Established infrastructure and end-user technology for a new Tulsa office supporting 200+ employees; coordinated site readiness, vendor activities, and deployment.

- Maintained 99.97% uptime for critical infrastructure and core applications while improving monitoring and proactive operations.

PROS | 2018–2022 | Houston, TX / Global
Director of IT Infrastructure Operations

Led global IT operations across 15 countries, managing more than 50 professionals, annual budgets of approximately $30M, and availability for global business services.

- Led application architecture teams supporting Workday ERP implementation and integration with Salesforce, Microsoft Dynamics AX, and OpenAir.
- Directed operational planning, service reliability, business continuity, disaster recovery, redundancy, and security controls; maintained monthly systems availability above 99.92%.
- Partnered with business and application teams to align enterprise systems, integrations, and infrastructure with operational needs.

CHAMPIONX (SLB) | 2017–2018 | The Woodlands, TX
IT Director

- Managed global IT operations and application/infrastructure teams, aligning technology delivery with business priorities.
- Oversaw Oracle NetSuite ERP, Power BI, Microsoft Azure, and product-development platform improvements; supported ERP and MES/shop-floor data integration for manufacturing and operational reporting.
- Built data warehouse and ETL workflows using Informatica and Jitterbit, integrating data from Oracle, Syteline, Microsoft Dynamics, Salesforce, QuickBooks, and Fishbowl, including production and MES-related data feeds for sales and operational reporting.
- Partnered with engineering and product development on an Azure-based IoT edge solution for real-time equipment performance monitoring, proactive alerts, and health information, linking equipment and production data to manufacturing systems.

BURCKHARDT COMPRESSION INC. | 2015–2017
Director of Global IT Governance (Zurich, Switzerland, Feb 2016–Jan 2017) | Global IT Service Portfolio Manager (Waller, TX, Apr 2015–Jan 2016)

- Led global ServiceNow implementation for incident, problem, change, asset, and service-catalog management.
- Supported SAP implementation and the migration of legacy applications, including manufacturing/MES and shop-floor application interfaces for compressor production; developed service-management processes, policies, SOPs, and performance metrics.

STEWART TITLE | 2012–2015
IT Manager

HONEYWELL INTERNATIONAL | 2010–2012 | Houston / Port Arthur, TX
Team Lead

AVIVA METALS | 2006–2010 | Houston, TX
IT Manager

EDUCATION & CERTIFICATIONS

Bachelor of Business and Commerce — University of Karachi, Pakistan
Certifications: Certified Information Security Manager (CISM) | Microsoft Certified Azure Administrator | ITIL 4 Foundation | Sigma Green Belt
Additional Training: AWS Technical Essentials, Cloud Operations on AWS, Migrating to AWS | Ignite Leadership Development Program, Rice University | Disney Institute Leadership and Service Training
